Mint of the United States at Philadelphia,

MELTING AND REFINING DEPARTMENT,

Philadelphia, 18 July —, 1884

Hon. A. Loudon Snowden

Superintendent.

Sir,

In reply to the letter of Victor G. Bloede of Baltimore, I would say that we have a few carboys in the year of waste acid, a mixture of Nitric & Muriatic acids with a little copper in solution, arising from cleaning the Base coinage, but that none of our Manufacturing Chemists deem it worth collecting and handling.

Respectfully yours,

Sa C. Booth
